Manor farm Scandal

We sent out our reporters to find out what exactly happened on Manor farm

By **Tony Clocks**

The animals of Manor farm have recently savaged the farm and forced their farmer to flee. Now it is the case that farmer Samuel Jones and local farmers have returned to retake their beloved grange from the mad animals on the inside. The battle known as 'The Battle of the Cowshed' was fought bravely by Jones and his men but the crazy beasts purposely injured and ambushed the cultivators and almost killed a stable-boy helping Jones!

Last Tuesday we reported on a shocking incident in which animals of Manor farm beastly and brutally attacked farmer Samuel Jones who was forced to escape. This has escalated locally and both Foxwood and Pinchfield (the neighbouring farms of Manor) have been overwhelmed with inactive animals. This has caused an inspection of farmsteads across derby, which revealed that the animals of Manor farm (or 'Animal Farm') have been fighting amongst themselves and are all struggling to survive without Mr Jones' definitive care.

Rumours from outside of the farm were proved correct when six brave farmers entered the deranged mess of the farm in an attempt to recapture it from the mad animals. Sam Jones, Toby Foxwood (of Foxwood farm), Bob Pinchfield (of pinchfield farm) and several other men including Danny Bront, a stable boy, heroically discovered the problems faced on

Iva Cow Leader of the FU speaking yesterday

the inside. The animals were raving mad! Jones, 48, a trained doctor claims that the reason for the madness is because the animals are not taking their daily dose of sunflower seeds. The barmy crew of livestock commanded waves upon waves of creatures to attack and ambush the helpless farmers.

In an emergency meeting held yesterday at the pentagon, Iva Cow, the leader of the Farmers Union was asked what he thought about what happened. He stated "...that unless [the animals] are captured and put down ASAP, the message will travel globally and all of [the animals] must die." This was said in an attempt to regain people's hope after a frenzied horse almost killed an innocent do-gooder in the struggle. The mare kicked Danny Bront, 16, a stable boy on work experience in an attempt to kill him but luckily failed, only knocking him out.

Danny said yesterday that "these animals right, are like vicious and won't give you no mercy or anything. I wouldn't want one as a pet if y'know what I mean". See next issue of 'The Fox' for developments on this gripping story. Hopefully farmers will regain control, but only time will tell.
